

## ***EXPLORING SCIENCE TOOLS***

**A funnel** – used for pouring

**A ruler** – used for measuring

**A magnifier** – used for looking

**An eyedropper** – used for adding

**A scale** – used for weighing

**A pencil** – used for writing information down

**Science Tools** – Scientists need to measure carefully, observe closely, and record their results. They use tools to help them do these things. When you work like a scientist, you need to know how to use these tools, too.
